DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a method of extracting nucleic acid from a sample.

Group II, claim(s) 7-22, drawn to a method of amplifying nucleic acid sample, an embodiment drawn to the amplification of K-ras sequence and primers/oligonucleotides involved in the amplification reaction. This Group is subject to further restriction.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

37 CFR 1.475 (b), states that claims drawn to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combination of categories:

- (1) A product and a process of producing the product
- (2) A product and a process of using the product
- (3) A product, process of producing the product, and a process of using the product
- (4) A process and an apparatus or means to carryout the process

Art Unit: 1637

(5) A product, a process of producing the product, and an apparatus of means to carryout the process.

An application containing claims to more or less than one of the “combinations of categories” of inventions set forth above, unity of invention might not be present. (MPEP 1850).

Inventions covered by Group II comprises a product, a method of producing the product, and/or method of using the product as required in 37 CFR 1.475 (b). Because the Group II already includes one of the above combinations, any additional categories of inventions in Group I has been determined to lack unity of invention in pursuant to 37 CFR 1.475(b).

Sequence Restriction for Group II

In addition, Group II reads on distinct Groups drawn to multiple sequences. The sequences are distinct because they are unrelated sequences, and a further lack of unity is applied to each Group. The Applicants must further elect **two SEQ ID Numbers** (pair of primers) for examination in the elected Group detailed above. Specifically, the SEQ ID Numbers elected for claim 10 **must** be the same for claims 11-22. Claims resulting in becoming drawn to non-elected SEQ ID Numbers as a result of Applicants’ election, will be withdrawn from further consideration as being drawn to non-elected invention.

A telephone call was not made to request an oral election to the above restriction requirement due to the complex nature of the requirement (MPEP § 812.01).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
